OUR PROCESS

1. ASSESSMENT

The first step in Care pest Control Service Process is a complete inspection. Our technician will visit your home or office and then they will use their tools and technology to inspect your property.

They will inspect every single corner of your home, inside and outside. It requires 20 minutes to 1 hour time depending on the size of the property. After completing the inspection process, Care pest Control Service team will provide a report and then they will give you a complete plan which is implementation.

2. IMPLEMENTATION

Implementation is the second step in Care pest Control Service process that includes the right chemical treatment in the affected areas of your house or office. The process requires a minimum 40 minutes of time to complete. After completing the implementation process, If requires, Care pest Control Service will give you further instructions and a guideline that needs to be followed if pest return.

3. MONITORING

The final step in Care pest Control Service process is monitoring; our customer support team will make regular follow-up phone calls and provide you service accordingly. Our team will work with you until you are satisfied. Besides, you can call Care pest Control Service Team anytime; we have 24/7 Customer Support System.
